AUTHOR INDEX

ADAMS, DONALD F.
Analysis of a Bonded Joint in a Composite Tube Subjected to Torsion, p. 211

ALLRED, RONALD E.
The Effect of Temperature and Moisture Content on the Flexural Response of Kevlar/Epoxy Laminates: Part I [0/90] Filament Orientation, p. 100

The Effect of Temperature and Moisture Content on the Flexural Response of Kevlar/Epoxy Laminates: Part II. [45/0/90] Filament Orientation, p. 117

ASHBEE, H. G.
Adhesive Joints Involving Composites and Laminates. Measurement of Stresses Caused by Resin Swelling, p. 492

AYDINOGLU, M. N.
Stresses in Adhesively Bonded Joints: A Closed-Form Solution, p. 249

BAR-JOSEPH, PINCHAS
Calculation of Interlaminar Stress Concentration in Composite Laminates, p. 225

BAUCHAU, OLIVIER A.
Experimental Measurement of Elastic Shear Modulus of Graphite/ Tubes, p. 151

BERGMAN, BO
On the Probability of Failure in the Chain-of-Bundles Model, p. 92

BONNIAU, P.
A Comparative Study of Water Absorption Theories Applied to Glass Epoxy Composites, p. 272

BRADSHAW, R. J.
Irreversible Hygrothermomechanical Behavior and Numerical Analysis in Anisotropic Materials, p. 502

BROWN, K. C.
Tubular Joint Design in Carbon Fiber Reinforced Platics, p. 359

BUNSELL, A. R.
A Comparative Study of Water Absorption Theories Applied to Glass Epoxy Composites, p. 272

CHANG, C. I.
Thermal Response ro Graphite Epoxy Composite Subjected to Rapid Heating, p. 427

CHOU, TSU-WEI
An Advanced Shear-Lag Model Applicable to Discontinuous Fiber Composites, p. 79

A Dynamic Explanation of the Hybrid Effect, p. 443

On the Relationship Between Engineering Properties and Delmaination of Composite Materials, p. 336

Three-Dimensional Inelastic Finite Element Analysis of Laminated Composites, p. 543

HSIAO, GEORGE C.
A Dynamic Explanation of the Hybrid Effect, p. 443

HYER, MICHAEL W.
Some Observations of the Cured Shape of Thin Unsymmetric Laminates, p. 175

Calculations of the Room-Temperature Shapes of Unsymmetric Laminates, p. 296

KAMAT, M. P.
Three-Dimensional Inelastic Finite Element Analysis of Laminated Composites, p. 543

KOUTSKY, JAMES
The Interlaminar Fracture Energy of Glass Fiber Reinforced Polyester Composites, p. 371

MALVERN, LAWRENCE E.
Wave Propagation Experiments on Ballistically Impacted Composite Laminates, p. 157

MASUMURA, R. A.
Thermal Response to Graphite Epoxy Composite Subjected to Rapid Heating, p. 427

MATTHEWS, F. L.
A Finite Element Analysis of Single and Two-Hole Bolted Joints in Fibre Reinforced Plastics, p. 481

MILLER, R. K.
Multi-Material Model Moisture Analysis for Steady-State Boundary Conditions, p. 142

NEMAT-NASSER, S.
Harmonic Waves with Arbitrary Propagation Direction in Layered Orthotropic Elastic Composites, p. 531

NORWOOD, C. J.
Tubular Joint Design in Carbon Fiber Reinforced Plastics, p. 359

O'BRIEN, KEVIN T.
Fatigue Damage Evaluation through Stiffness Measurements in Boron-Epoxy Laminates, p. 55

OTSUKA, HIROMITSU
Variations in Acoustic Emission Between Graphite-and Glass-Epoxy Composites, p. 591

PAPADOPOULOS, G. A.
The Effect of Filler-Volume Fraction on Crack-Propagation Behavior of Particulate Composites, p. 41

PAPANICOLAOU, G. C.
The Effect of Filler-Volume Fraction on Crack-Propagation Behavior of Particulate Composites, p. 41

PIAN, THEODORE H. H.
Calculation of Interlaminar Stress Concentration in Composite Laminates, p. 225

REIFSNIDER, KENNETH L.
Fatigue Damage Evaluation through Stiffness Measurements in Boron-Epoxy Laminates, p. 55

SARGENT, J. P.
Adhesive Joints Involving Composites and Laminates. Measurement of Stresses Caused by Resin Swelling, p. 492

SAWADA, YOSHIHIRO
Clamping Methods for Tensile Test of Carbon Fiber Strand, p. 582

SCARTON, HENRY A.
Variations in Acoustic Emission Between Graphite- and Glass-Epoxy Composites, p. 59$

SCHNEIDER, M.
The Linear Anisotropic Plate, p. 71

SHINDO, AKIO
Clamping Methods for Tensile Test of Carbon Fiber Strand, p. 582

SIERAKOWSKI. ROBERT L.
Wave Propagation Experiments on Ballistically Impacted Composite Laminates, p. 157

STASSINAKIS, C. A.
Crack Propagation in Fibrous Composite Materials Studied by SEM, p. 133

TAKEDA, NOBUO
Wave Propagation Experiments on Ballistically Impacted Composite Laminates, p. 157

TANG, S.
Failure of Composite Joints Under Combined Tension and Bolt Loads, p. 329

TAUCHERT, T. R.
Optimum Design of a Reinforced Cylindrical Pressure Vessel, p. 390

TAYA, MINORU
On Stiffness and Strength of an Aligned Short-Fiber Reinforced Composite Containing Penny-Shaped Cracks in the Matrix, p. 198

THEOCARIS, P. S.
The Effect of Filler-Volume Fraction on Crack-Propagation Behavior of Particulate Composites, p. 41

Crack Propagation in Fibrous Composite Materials Studied by SEM, p. 133

UEMURA, M.
Probabilistic Burst Strength of Filament-Wound Cylinders Under Internal Pressure, p. 462

WEITSMAN, Y.
A Rapidly Convergent Scheme to Compute Moisture Profiles in Composite Materials Under Fluctuating Ambient Conditions, p. 349

WETHERHOLD, ROBERT C.
Reliability Calcuations for Strength of a Fibrous Composite Under Multi-axial Loading, p. 240

WHITCOMB, JOHN D.
Finite Element Analysis of Instability Related Delamination Growth, p. 403

WONG, C. M. S.
A Finite Element Analysis of Single and Two-Hole Bolted Joints in Fibre Reinforced Plastics, p. 481

ZING, JI
A Dynamic Explanation of the Hybrid Effect, p. 443

YAMADA, M.
Harmonic Waves with Arbitrary Propagation Direction in Layered Orthotropic Elastic Composites, p. 531

SUBJECT INDEX

Ablation, p. 427

Adhesive bonding, p. 561

Adhesive joints, p. 492

Adhesive stresses, p. 211, p. 249

Anamalous cure behavior, p. 175

Anisotropic, p. 71

AS/3501-6, p. 427

Ballistic impact, p. 157

Bolted joints, p. 481

Bonded joints, p. 211

Boron, epoxy, fatigue damage, p. 55

Burst strength, p. 462

Clamping methods, carbon fibers, p. 582

Carbon fiber tensile test, p. 582

Compliance, p. 371

Composite laminates, p. 157

Composites, p. 336, p. 403

Composite tubes, p. 211

Crack propagation, p. 371

Cracks, effect on stiffness/fracture, p. 198

Cylindrical pressure vessel, p. 390

Cylindrical specimens, p. 151

Delamination, p. 336, p. 403

Design, p. 311, p. 336, p. 359

Design criteria, epoxy composites, p. 502

Design, pressure vessel, p. 390

Embedded strain gages, p. 157

Engineering properties, p. 336

Epoxy/fiber, moisture/heat transfer, p. 502

Failure modes, delaminations, p. 100, p. 117

Failure, tension/bolt loads, p. 329

Fatigue damage, p. 403

Fatigue damage, boron/epoxy composites, p. 55

Fiber, p. 133

Fiber fracture, p. 443

Filament buckling, p. 100, p. 117

Filament-wound cylinder, p. 462

Finite difference, p. 427

Finite element analysis, p. 211, p. 359

Finite elements, p. 249

Flexural properties, strength, modulus, p. 100, p. 117

Flexural wave, p. 157

Fracture, p. 41, p. 133

[Fracture, FG composites,], p. 521

Free edge stress analysis, new methods, p. 225

Glass/epoxy, 272

Glass/epoxy, acoustic emissions, p. 591

Glass polyester composite, p. 371

graphite/epoxy, p. 151, p. 427

Graphite/epoxy, acoustic emissions, p. 591

Graphite/epoxy cylinder, p. 462

Heat transfer, p. 427

Harmonic wave dispersion, p. 531

Holes, p. 311
Hybrid effect, p. 443
Hygrothermal exposure, p. 21
Hygrothermal loadings, p. 211
Hysteresis loop energy, p. 371
Interlaminar fracture energy, p. 371
Interlaminate stresses, p. 71, p. 336, p. 225
Joint failure, p. 329
Kevlar 49/Epoxy composites, p. 100, p. 117
Laminated tubes, p. 211
Laminates, p. 311, p. 403
Laser irradiation, p. 427
Local buckling, p. 403
Maximum distortional energy, p. 240
Microscope, p. 133
Model, for curvature changes, p. 21
Model, for moisture absorption, p. 142
Moisture absorption, model, p. 142
Moisture effects, environment, p. 100, p. 117
Moisture in composites, p. 349
Nonlinear shear characteristics, p. 462
Nonlinear stress analysis, p. 403
Off-axis tensile test, p. 240
Orthotropic adherends, p. 249
Plate theory, p. 71
Prediction, thermal expansion, p. 2
Probalistic strength, p. 462
Reinforcement, p. 133, p. 359
Reliability, p. 92, p. 240
Reinforcement, p. 41
Resin swelling, stress caused, p. 492
Room temperature shapes, unsymmetric laminates, p. 296
Scanning, p. 133
Shear log model, p. 79
Shear modulus, p. 151
Single lap joint, p. 249
Singular expansions, p. 71
Statistical distributions, p. 72
Statistics of failure, p. 240
Stiffness/fracure, prediction, p. 198
Strain energy release rate, p. 371
Stress concentrations, p. 311
Stress, predicting in composites, p. 79
Surface heating, p. 427
Temperature effects, p. 100
Tensile strength, p. 92
Thermal expansion coefficient, p. 2
Thin, unsymmetric laminates, p. 175
Three dimensional analyses, p. 543
Time, temperature effect, in adhesive joints, p. 561
Torsion, p. 211
Tsai-Wu criterion, p. 240
Two-hole joints, p. 481
Ultimate fracture analysis, p. 462
Uni-directional fibre composites, p. 92
Unsymmetric laminates, room temperatures shapes, p. 296
Variational methods, p. 71
Viscoelastic response, p. 21
Water absorption theories, p. 272
Wave propagation, p. 157
Weibull density functions, p. 92
Width tapered double cantilever beam, p. 371
